

# The disappearance of the Valserine trail

Terre Valserine - Valserhone

Pertes de la Valserine (GTJ) / Alain Perrier)

From the heart of Bellegarde, this hike leads to the bowels of the Valserine, an affluent of the Rhône.

In these wild gorges, men had the tenacity to build constructions to exploit the driving force of the water. At its peak, where the waters of the Valserine disappear into the canyon, the Pont des Oulles bridge offers a view of a very strange geological phenomenon.

## 12- PLM pavilion (A)

In the very hierarchical and social world of the Compagnie de chemin de fer PLM, some railway workers and their families were housed based on their responsibilities and qualifications within the Compagnie. These individual houses were usually built according to standard blueprints, as were the watch houses and some technical buildings (PNRHJ - Un tour en ville, "A tour of the town").
